SUMMER IS HERE (OFFICIALLY)!!!

How is the temperature in your Building? Despite summer's hot and humid weather, there is a federally mandated restriction to keep building temperatures at 78°. Therefore, employees are encouraged to dress more comfortably with consideration for job safety and overall appearance in representing the University to the general public. There have been several mechanical problems with the cooling system that have been corrected. But a few buildings (Administrative Center to name one) have both the blowers and the return vents located in the ceiling which is part of the problem. If you are using a fan, make sure the fan is elevated and not directed toward the ceiling. Keep blinds closed and if temperature exceeds 78°, please call extension 5661.

STAFF AWARDS

Staff Awards Day Luncheon will be held on Monday, September 29, 1986 at 12 noon in the University Center Ballroom. Hopefully, staff members who have different schedules from the regular 8:15 to 4:30 hours will be able to attend this year.
